PROFILE

BCA student at Eternal University building full-stack web applications with React, Node.js, Express.js and MongoDB. Deployed a healthcare-travel support platform and currently building an AI-powered collaborative notes application using the Google Gemini API. Looking for an entry-level full-stack or frontend developer role or internship where I can build reliable, user-friendly products and keep learning.

EXPERIENCE

ShifoPath India | **Full-Stack Developer, self-initiated project**
Live Demo: https://shifopathindia-4gd0.onrender.com/

- Built and deployed a web platform for patient-support and healthcare travel services using the MERN stack.
- Presented services such as medical appointments, accommodation, local transportation and translation assistance in a clear, accessible layout.
- Focused on a professional, easy-to-use interface that works across devices.

Tech: React.js, JavaScript, Node.js, Express.js, MongoDB

PROJECTS

CollabSphere | **Full-stack application (in progress)**
Live Demo: https://phase-7-1.onrender.com/

- Building an application with user authentication, collaborative Markdown notes and an AI-powered README generator.
- Developing frontend and backend in one integrated application, with database operations and REST API integration.
- Integrating the Google Gemini API for AI-generated content.

Tech: React.js, Node.js, Express.js, MongoDB, Google Gemini API

Personal Portfolio Website | **Portfolio**
